

This document addresses known errata and documentation issues for the HyperTransport MegaCore® function version 7.1. Errata are functional defects or errors, which may cause the HyperTransport MegaCore function to deviate from published specifications. Documentation issues include errors, unclear descriptions, or omissions from current published specifications or product documents.

For the most up-to-date errata for this release, refer to the *HyperTransport MegaCore Function v7.1 Errata Sheet* on the Altera website.

HyperTransport MegaCore Function v7.1 Issues
