

[Video: 5 Reasons to Use a Soft-Core MIPS Processor in Your Next Custom Design](#), 10 minutes

Watch this video to learn five reasons why you should use a soft-core MIPS processor in your next custom design. Get insights about the MP32 processor, the first 100 percent MIPS-compatible soft processor available for Altera® FPGAs and HardCopy® ASICs.

[Video: Sneak Peek: Industry's First 28-nm High-End FPGA Running at 14.1 Gbps](#), 3 minutes

Watch this video to see the progress of the Stratix® V FPGA characterization process, as well as 14.1-Gbps transceiver performance. Stratix V FPGAs are the industry's first 28-nm high-end FPGAs. Samples are now shipping.

[Webcast: Scale Beyond 1080p with 4K Design Methodology](#), 18 minutes

In this webcast, learn how our FPGAs and video framework simplify your 4K video system design, support multichannel format conversion, and reduce system cost and complexity. See how up/down conversion reference designs help you kick start your system development. This webcast looks at three reasons why FPGAs are beneficial in industrial applications. Serving as coprocessors or in system-on-a-chip (SoC) implementations, FPGAs can help lower the total cost of ownership of industrial applications.
