

This schematic only shows the critical components and traces for minimum footprint with ENABLE as a separate signal. Alternate ENABLE configurations, and the POK pin need to be connected and routed according to the customer application.

Revision	Description	Date	Approved
p1	Preliminary Release		

Component Values Table

Component	EN5329	EN5319
Cin	22uF/0805	10uF/0805
Cout	47uF/0805*	22uF/0805*
Ca	See Datasheet.	

* See datasheet for other output capacitor options.
