

PRODUCT DISCONTINUANCE NOTICE EPX780 TO BECOME OBSOLETE

With the recent introduction of the FLASH-based EPX880, Altera will now obsolete the EPX780 product (all packages, speed- and temperature-grades). The EPX880 is pin-, function-, and programming file-compatible with the EPX780, and therefore this obsolescence should have a minimal impact on any current designs. Table 1 give a summary of the EPX780 ordering codes affected by this obsolescence.

Obsolescence Plan

Deadline for last orders: June 28, 1996.

Date for last shipments by Altera: September 30, 1996.

Table 1: Summary of Devices to Become Obsolete

Existing Code	Substitute Code
EPX780LC84-10	EPX880LC84-10
EPX780LC84-10Z	EPX880LC84-10
