

PRODUCT DISCONTINUANCE NOTICE

Tools Obsolescence

Altera has improved the development tools product line to provide more features and enhancements to our customers, and has simplified the maintenance product line to better respond to customer needs. These changes provide a more efficient and streamlined development tools product structure. The design sites, migration products, and maintenance packages listed below will no longer be available effective September 8, 1997. In all cases, replacement products are suggested below.

OBSOLESCENCE PLAN
